

SPECIFICATIONS

MODEL	SA-200-F162
TYPE	K-6090
Current Rating (NEMA) at 40 volts	200 amps
Duty Cycle	60%
Current Range	40 to 300
Engine, Continental 4-cylinder	F-162
Bore and Stroke	3 1/4" x 4 1/2"
Piston Displacement	162 cu. in.
Horsepower at 1450 r.p.m.	35
OPERATING SPEEDS:	
Full Load	1450 r.p.m.
High Idle	1550 r.p.m.
Low Idle	1000 r.p.m.
CAPACITY:	
Oil (Quarts)	4
Water (Quarts)	104
Gasoline (Gallons)	15
WEIGHTS:	
Net	1170 lbs.
Shipping Domestic	1260 lbs.
Shipping Export	1414 lbs.

WELDER FEATURES

CONTROLS—Dual Controls for precise arc selection. Five-step current control and continuous voltage control give welder the best arc for each application. Conveniently located on the rear panel where they may be adjusted while the doors are closed.

SAFETY—Completely enclosed electrical components (with exception of welding cable terminals) prevent accidental shorts. Terminals are on rear panel near the controls.

AUXILIARY POWER—A standard two-prong receptacle provides 1 KW of 115 volt DC auxiliary power for running lights and universal power tools. Standard at no extra cost on all Lincoln K-6090's.

RUGGED CONSTRUCTION—Every detail of the SA-200, from the sturdy frame to the protected radiator, has been designed to take the unavoidable abuse which occurs when hauling over rough terrain.

NEMA RATING—Assures that minimum output is sufficient to meet your needs. However, the K-6090 provides considerable capacity above the requirements of NEMA rating.

ENGINE FEATURES

ENGINE—The dependable four cylinder Continental F-162 with a new high compression head operates at slow speed for least wear and longest life—has plenty of reserve power to give continued maximum output throughout its years of service.

LUBRICATION—Continental gear type oil pump. Fram oil filter assures delivery of clean oil—uses low cost replacement cartridge. System provides pressure lubrication to reduce wear on all main bearings, lower connecting rods, and camshaft bearings. Special pan provides oil even when the welder is on steep slopes.

Cooling—Extra large, positive pressure type radiator with 13 lb. cap reduces coolant boiling in summer and permits use of methanol anti-freeze in the winter. System has a Continental centrifugal, belt-driven water pump.

FUEL SYSTEM—Large welded steel gasoline tank is lead plated for corrosion resistance, holds 15 gallons for over twelve hours of continuous operation without refilling. Sediment bowl in the gravity feed fuel line supplying clean gasoline to the Marvel-Schebler carburetor. The carburetor is a heavy-duty industry up-draft type with both main and idling jets for smooth idling and economical operation.

IGNITION SYSTEM—Impulse starter coupling on high tension magneto lies at Top Dead Center for safe, easy, hand cranking—disengages after starting.

GOVERNOR—Gear driven, fly ball type, constant speed centrifugal governor maintains proper engine speed under all load conditions.

AIR CLEANER—Heavy duty, Donaldson stack type, oil bath filter keeps abrasive dust out of the engine—extends time between oil changes.

ENGINE IDLER—Automatically reduces engine speed when not welding, but only after sufficient time has gone by to allow changing electrodes without having engine slow down. Lincoln Type R-57, delayed action, AUTOMATIC idler conserves fuel, decreases wear and increases life.

OPTIONAL FEATURES (at extra cost)

UNDERCARRIAGE—Lincoln's K-755 two wheeled pneumatic tired undercarriage is ideal for road towing. It is spring mounted and has a 63° tread for maximum stability. K-755 narrow tread undercarriage with 400 x 12 pneumatic tires is designed for inside use; 35° overall width enables handling through doorways and aisles.

SELF-STARTER—A 12-volt battery driven self-starter with magneto ignition and generator provides instant starting at the push of a button. A new type generator prevents overcharging, but makes possible fast charging when desired. Self-starters are factory installed on Model K-6090-311. Also available as a Kit for field installation.

VOLTMETER—Factory installed voltmeter is available on special order.
